Mauritius Telecom hosts the 11th ICTs for Human Capital Development 2016

Posted 13 Jul 2016

Jacob Munodawafa, Executive Secretary of SATA

The opening ceremony of the 11th ICT for Human Capital Development (ICT4HCD) Workshop of the Southern African Telecommunications Association (SATA) hosted by Mauritius Telecom took place on Wednesday 13 July at Hotel Sofitel Mauritius l'Impérial in Flic en Flac.

The objectives of the ICT4HCD formerly Human Capital Development and e-Learning series now in the 11th year are to provide a regional forum for HR experts to network, discuss, share knowledge, experience and latest thinking and come up with the way forward and future work programmes for managing and developing Human Capital within the context of the challenges facing the ICTs sector.

The 3-day workshop is gathering about 30 participants from members of the SATA, Executives and Senior Managers from Ministries, Regulators Telecom Operators and the Telecommunication Industry.

In his speech, Etienne Sinatambou, Minister of Technology, Communication and Innovation, has stressed on the “creation of an inclusive information society” and on a “citizen centric synergy” through the ICT sector.
Viren Bissoonauth, Chief Information Officer de Mauritius Telecom

The ICT4HCD working group terms of reference includes:

- Harnessing the power of e-Learning and empowering the minds
- ICTs applications and their impact on the human capital
- Technology trends and impact on human capital development
- Skills, knowledge, experience transfer through the network of Centres of Excellence
- Strategic human resources management
- Use of social media in developing skills and knowledge
