*“DEVELOPMENT OF A SUPERAPP BASED ON VERIFIABLE DIGITAL CREDENTIALS IN A SECURE ID WALLET” Ref: MITCI//RFI/02/2025-26.*

The sealed envelope should be deposited in the **Tender Box** situated on **6<sup>th</sup> Floor, SICOM Tower** at the **Ministry of Information Technology, Communication and Innovation, Wall Street, Ebene** or submitted/sent by registered post or Courier Service to the **Registry of the Ministry of Information Technology, Communication and Innovation, 6<sup>th</sup> Floor, SICOM Tower, Wall Street, Ebene** on or before **24 October 2025 at 13.30 hrs (Mauritian time).**

#### 4. Clarification

Also note that following request dated 26 September 2025 from a potential supplier via email, kindly find hereunder the queries and their corresponding replies:

#### Queries/ Replies

Query No.	Queries	Comments/ Replies to Queries
1.	Does MITCI have a preference towards a certain type of blockchain (for instance permissioned) and what are the key objectives the blockchain solution must attain?	<p>Bidder to propose a cost-effective and scalable blockchain which is adaptable to the context of Mauritius and has the ability to process high volume of transaction.</p> <p>The block chain will need to achieve Self Sovereign Identity using a Digital wallet in the SuperApp and make use of selective disclosure including advanced cryptographic techniques of Zero Knowledge proof for sharing of information.</p> <p>The following documents is expected to be available in the Digital wallet</p> <ol style="list-style-type: none"><li>1. Mobile id</li><li>2. Health card</li><li>3. Driving License</li><li>4. Driving license counter part</li><li>5. Payslip</li><li>6. Birth Certificate</li><li>7. Marriage Certificate</li><li>8. Proof of Address</li><li>9. Pension contribution</li></ol>
2.	Is MITCI considering the SuperApp as the waypoint for a new domestic payment system (with tokenization and full integration in banking system)? Or it shall just allow to proceed payment to gov services using banking card?	<p>No,</p> <p>The MITCI will be leveraging on the existing payment gateways (national payment switch (MAUCAS) and cards)</p>
3.	Is the super app envisioned to include functionalities from private services, like banking, messaging?	<p>Features such as banking and messaging could be envisioned. As such bidders are encouraged to suggests solution and integration methods based on their expertise and capabilities of their platform.</p>
