INNOVATION**

**Executive Summary of Bid Evaluation Report**

**Supply, Installation, Configuration and Commissioning of High-performance  
servers, a storage Area Network (SAN) & Backup Solution for the GOC  
(Main Site) and Disaster Recovery Site (DR Site)**

**MITCI/ONB/11/2025-26 (MITCI/IFB/2025/478)**

**1. Scope of Contract:**

- Bidder to install and configure a turnkey solution within the GOC Data centre and DR site on a clustered hypervisor using Server/SAN model on high availability
- Bidder will be required to configure storage solution, server nodes and TOR switches as a complete functional solution at the GOC Data centre and DR site
- Bidder will need to configure the network connectivity and set up VLAN tagging for virtual machines to be deployed on the hypervisor in a clustered active – active model across the 2 sites.
- Bidder should assist and configure for any upgrade to cater for scalability of the proposed solution across the 2 sites
- Bidder should design a SAN architecture with Active-Active configuration ensuring high availability, redundancy, and fault tolerance.
- Bidder should propose disaster recovery and business continuity strategies aligned with the Active-Active setup
- Bidder should supply required SAN management software, server OS licenses, clustering software, and any third-party software required for Active-Active failover and load balancing
- Bidder should set up server clustering or federation in Active-Active mode, ensuring data synchronization and load balancing.
- Bidder should configure replication or synchronous mirroring between GOC Data centre and DR Site for SAN data.

Bidder should conduct comprehensive testing including:

- Failover and fallback tests for Active-Active setup
- Disaster recovery drills
- Data integrity and consistency tests
